**The application has been amended as follows:**

**In the claims:**

✓ Claim 25, page 13, line 6, "at" has been inserted before – least--.

**In the specification:**

✓ On page 4, line 25, "10/780,525" has been inserted before –entitled--.

✓ On page 4, line 26, "10/780,520" has been inserted before –entitled--.

✓ On page 4, line 27, "10/780,536" has been inserted after –and--.

***Allowable Subject Matter*** ✓

2. The following is a statement of reasons for the indication of allowable subject matter: Claims 1 and 14 are allowable over the art of record because the prior art does not teach the dual-frequency antennas are configured to permit intermodulation of the first and second frequencies generating a signal of a third frequency corresponding to the difference between the first and second frequencies, and in combination with the remaining claimed limitations.

Claim 25 is allowable over the art of record because the prior art does not teach a method of receiving the electromagnetic beam and the electromagnetic radiation of the object at a high-frequency antenna comprising a plurality of dual-frequency antennas disposed in the focal plane, each dual-frequency antenna including at least two dipole antennas and converting the first and second frequencies to a signal at the difference frequency through a nonlinear resonant circuit coupling the at least two dipole antennas, thereby providing an image, and in combination with the remaining claimed limitations.

### *Conclusion*

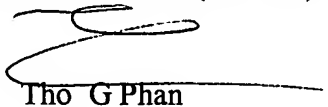

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Rees, Blake et al, Moss, Nakamura et al, Robertson et al and Alder et al are cited as of interested and illustrated a similar structure to a high-frequency imaging system.
